Dear Sir:

Applicants respectfully request the Examiner to enter the following amendments in the above-referenced application before the issuance thereof.

In the Specification:

Please replace the paragraph on page 9, line 5, with that provided below:

As will be appreciated throughout this disclosure, the touch screen arrangement 200 is preferably configured for permitting the operator to freely and flexibly incorporate phases of contrast medium infusion and phases of flushing medium infusion with respect to one another in a manner that has hitherto apparently not been contemplated nor realized. (A definition of "phases" may be found in the "Background" section of this disclosure). Further, the present invention also broadly contemplates, in accordance with at least one presently preferred embodiment, optional "hold" and "pause" phases as discussed herebelow.
